

Please read these instructions carefully.

UKKIT40

1. Remove the wheel (twist lock anti-clockwise)
2. Lay wheel flat like a clock face. Goats head at 12 o'clock.
3. Use a flat end screwdriver to prise off the old lock.(3 lugs)
4. Remove old spring clip.(Clean & wipe area)
5. Keep raised peg at 12 o'clock, then fit new spring as shown in the diagram.(Spray with furniture polish)
6. Re-fit the lock so that the locating pin on the lock (green wheel hub) is above the pin on the wheel, push firmly home. There should be tension if turned anticlockwise and will spring back on its own.
7. You can now re-fit the wheel to the trolley.

Note:

If the old lock is brittle there is a chance this can crack please make sure you stand back when prising off the lock.
