

Please read these instructions carefully. Faulty parts which are under warranty should be returned.

FITTING INSTRUCTIONS - SPEED CONTROL KNOB**UKKIT1**

1. Insert a 1/16 allen key into the side of the control knob and loosen the grub screw.
2. Remove the control knob.
3. Fit the new control knob so it slides completely on the blue spindle, keeping the grub screw (already in the control knob) in line with the flat side of the blue spindle (switch).
4. Tighten the grub screw firmly, Take care not to over tighten.
5. There should be approx 1or 2 mm gap between the control knob and the handle assembly.
